

## GLAZEX 72

### Characteristics of Emulsion

Appearance	: Beige Opaque Liquid
Base	: Stabilized Albumin and Synthetic Proteins and Casein
Solid Content	: 13 ± 1%
pH (10% Sol.)	: 8.5 ± 0.5
Nature	: Self Crosslinking Protein Binder

*High performance Protein binder top coat based on French Casein and feel modifying polyethylene wax for outstanding surface properties.*

GLAZEX 72 is used in glazing and polish finishes of high value leathers that require a very thin, highly transparent and brilliant finish with a silky feel. The Polyethylene wax dispersion in combination with French Casein provides high congealing point, toughness and abrasion resistance. The final finish has good acetone and solvent resistance, perfect plate release and stacking properties.

GLAZEX 72 can be used as single protein element in soft finishes. It can be fixed with formaline or other crosslinkers.
