Compact Fatliquor for high softness, fullness, wet & waxy feel.

LUBER SAS is an anionic fatliquor to provide internal softness, fullness and roundness to the leather. Unlike most phosphated fatliquors, Luber SAS imparts a wet and waxy surface feel to treated leathers and is an ideal choice for sophisticated nappa and upholstery. It also promotes efficient dispersion that results in well levelled dyeing.

LUBER SAS has excellent lightfastness profile and is safe for producing white and pastel coloured leathers provided other fatliquors are also lightfast. It is fairly stable to salts and electrolytes and hence may be added in small doses (about 1-2%) during rechroming or neutralisation to optimise the softening effect.
