

PROTOP SP

Characteristics of Emulsion

Appearance	: Straw like (can change the color)
Basic Ingredients	: Casein
Solid Content	: 18 ± 1%
pH (10% Sol.)	: 8.5 ± 0.5
Charge	: Anionic
Film Appearance	: Transparent, very glossy, flexible

REACH COMPLIANT

Green-Trek- Compliant

A symbol of our commitment to sustainable technologies

Storage : Store between +5 °c to 35 °c in original pack, well-sealed & stored.  
 Shelf-life : Product is stable for 6 months from the date of production / Invoice.

Non flammable

Avoid direct contact with skin

Prevent from freezing

Use Gloves / Ensure Ventilation

*Polyamide based protein binder for fullness and brilliancy in glaze and polish finish.*

PROTOP SP is a classical synthetic and aqueous dispersion used in glazed and resin finishing, and highly appreciated for its fullness and brilliant effects. It has good filling action on corrected grain leathers and gives finishing a smooth and silky touch together with a smooth/flat grain. It also increases wet and dry rub-fastness and affords good cold-crack resistance. When used in resin finishing season, it improves the plate release properties.

PROTOP SP can be modified with Protop 18 to improve plasticisation and can be used as a main binder in glaze finish. It can also be modified with Glaze Top N for polish finish with a waxy touch. It can be normally fixed with formalin & crosslinkers.

Usage

Stir before use

Polish Finish	:	40	parts	Pigment - Nano Series
		60	parts	Dye Solution - Novolene Series
		100	parts	Protop SP
		50	parts	GlazEx 72
		100	parts	Glaze Top N
		650	parts	Water
Glaze Finish	:	30	parts	Pigment - Nano Series
		70	parts	Dye Solution - Novolene Series
		100	parts	Protop SP
		75	parts	Protop 18
		725	parts	Water
Sheep Caberretta	:	60	parts	Pigment - Nano Series
		40	parts	Dye Solution - Novolene Series
		150	parts	Protop SP
		75	parts	Glaze Top N
		75	parts	Protop 18
		600	parts	Water

IMPORTANT: PROTECT FROM FREEZING.
