Cationic, aliphatic polyurethane binder dispersion, suitable for ground coat to get very good sealing for high-end nappas, softies.

PUD 48 KT is applied as a ground for sealing and excellent adhesion of subsequent finishes for full grain leathers, particularly sheep skins and nappas with structural defects. The product is designed to be the main resin component for cationic finishing system. It exhibits outstanding UV lightfastness, good mechanical stability and flow out, and maintains a soft fine, uniform grain break.

The product may be used alone or in combination with Acril-m KT 35 as main binder in finishing season. It is compatible with most cationic acrylic binders, fillers, wax emulsions, cationic proteins and other cationic auxiliaries.
